

"We have No Life in Anker Center"

.....

I would like to express my heartfelt gratitude at the bottom of my heart to these group because you invite me in this meeting and I got the chance to discuss with you about multi challenges what we faced in the Anker center. If I say so now I am going to raise the main problems we faced in the Anker center. As all of you know that "We are asylum seekers, not the criminals". As we are the asylum seekers, the German government responsible to give us protection and we have the right to get basic needs in right ways according to the law of the refugees. However, those refugees who are living in zeißstrase Anker center faced so many challenges and even the government does not treated us like human beings. For Example

1. Most the Ethiopian refugees came to Europe by crossing the Sahara desert, the Mediterranean sea, the Libyan harsh prison and other related challenges on the journey . Many die in the Sahara desert and Mediterranean Sea. International media reported that the challenges in Sudan, Libya, Sahara desert and the abuses by human traffickers and smugglers from the home country to Libya and Europe. To justify this reality we Ethiopian refugees now living in zeißstrase are a practical eyewitness example. However, when we looking the BAMF decisions for Ethiopian asylum seekers case is the reverse. Because the reality shows that almost all Ethiopian refugees getting reject because of being Ethiopian.
2. We lived in transit center more than one year, even without sufficient basic necessity like food. The last nine months we ate only one times per day (only lunch) but since three month there is also breakfast. However, still there is quantity and quality food and basic needs problem in the Anker center. This is shame for Germany. Because Germany is one of the democrat and developed country
3. The government deliberately isolate refugees from any integration from the society that is why we are living in Transit center more than one year. Because of if we are in Anker center we can't get the chance to learn Dutch course and we can't work at all.
4. I don't know exactly what the refugee's law says but there is a transfer to the living house. But since one year totally there is no transfer because refugees are deliberately isolated from integration.
5. The only thing what we are going to do is sleeping, walking, eating, talking thinking too much..... Because of these all refugees are exposed to stress, hopeless and depression.....because of these some of the refugees are committing even a crime inside and outside the camp.
6. There is always disagreement and even open conflicts between the Ethiopian, Moldavian and Nigerian refugees because we are more than 500 and living together in containers and we are using scare resources at the same time like wash machine, kitchen, toilet, and others.

7. If someone violate the rule of the camp, according to the law he/she must be penalized personally. However, we practically obsessed that if someone doing something in the wrong way, the office decide negative decision and take common punishment. Like closing the kitchen toilet and wash machine. That means they concluded that "all Ethiopians are non-disciplined." This is not right decision.

8. We Ethiopians are currently under the risk of deportation not to European country rather to our home country. But the fact show that the last 27 years our country ruled by one minority ethnic family. Still now there is no peaceful transition of political power. Because of this in every parts of the country there is always mass protest against dictatorship government and the government killed and arrest the people who are against with them. That is why we are in Germany in order to save our life from danger. But practically we observed that the German government punished us like criminals

Generally speaking, as asylum seekers we have no life in the Anker center

Therefore, Stand together and fight for refugees rights
Thanks for your attention

big demo

*I love Germany not only
who love refugees but also
who hate refugees because
I learned much from them*
